

Kevin Porras Campos

Software Engineer | Python · Data Pipelines · AI-Assisted Workflows
Alajuela, Costa Rica · +506 8645-7832 · kevinporras9906@gmail.com · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL PROFILE

Software engineer with hands-on experience building and shipping production web applications and automated data workflows using Python, PHP (Laravel), and modern JavaScript. Solid foundations in backend architecture, relational database design, RESTful/SOAP API integration, and CI/CD practices within Agile teams. Practical experience applying AI and LLM tools (Claude, ChatGPT, Gemini) to real engineering workflows — including prompt design, AI-assisted parsing, and rapid prototyping. Fast learner with a strong interest in data acquisition, extraction pipelines, and transforming unstructured data into reliable, validated datasets.

WORK EXPERIENCE

Full Stack Developer (Intern) — Team Steam S.R.L.

Jul 2024 – Dec 2024

- Built and maintained production Laravel 11 / PHP 8 applications, writing clean, testable code with MVC architecture, authentication flows, and relational database schemas (MySQL/PostgreSQL).
- Automated Excel-based reporting workflows, transforming raw operational data into validated, structured reports and significantly reducing manual processing time.
- Developed internal dashboards with real-time data visualization consuming RESTful APIs.
- Collaborated in an Agile team using Azure DevOps (Boards & Repos) for sprint planning, code reviews, and CI/CD pipeline management, shipping incremental improvements each sprint.

Software Developer (Academic Project) — Municipalidad de San Isidro de Heredia

Feb 2023 – Jun 2024

- Designed and delivered a full-featured Helpdesk system with Laravel, cutting IT incident resolution time by ~70%.
- Implemented secure role-based access control (RBAC), multi-factor authentication, and automated email/SMS notification pipelines integrating third-party APIs.
- Deployed and operated the application on a Linux server: environment configuration, database migrations, logging, and ongoing maintenance in a production-like setting.

PROJECTS

Voice Notes to Tasks Converter — Personal Project (AI/LLM)

2025

- Web app that converts voice notes into structured task lists using the Web Speech API and the Anthropic Claude API — designed prompts and parsing logic to transform unstructured speech input into validated, structured JSON output.

EDUCATION

B.S. in Information Systems Engineering — Universidad Nacional de Costa Rica

Feb 2020 – Dec 2024

- Currently pursuing cloud fundamentals training through AWS Skill Builder and Google Cloud Skills Boost (self-paced).

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, TypeScript, Java, C++, SQL

Data & Integration: RESTful & SOAP API integration, ETL concepts, data transformation and automated reporting, JSON/XML/HTML handling

AI / LLM: Anthropic Claude API, prompt design and evaluation, AI-assisted parsing and code workflows (Claude, ChatGPT, Gemini)

Frameworks: Laravel, ReactJS, Bootstrap

Databases: MySQL, PostgreSQL, Supabase (Postgres, Auth, Realtime, Storage)

Cloud & DevOps: AWS (EC2, RDS), Microsoft Azure, Docker (basic), GitHub Actions, CI/CD pipelines, Linux CLI, Netlify

Auth & Payments: Clerk Auth, Stripe, JWT, Laravel Sanctum

Collaboration: Git, GitHub, Azure DevOps (Boards & Repos), Agile/Scrum, code reviews

Languages (spoken): English — B2 Upper Intermediate · Spanish — Native
